

Enhance Your Legacy

Family Endowment Rider®

Optional Rider

Driven to do more.®  ATHENE

The Product Brochure is required to be used in conjunction with the Additional Information Insert (83150).
This material is provided by Athene Annuity and Life Company (61689) headquartered in West Des Moines, Iowa, which issues annuities in 49 states (excluding NY) and D.C., and Athene Annuity & Life Assurance Company of New York (68039) headquartered in Pearl River, New York, which issues annuities in New York.
Products not available in all states.

Protect Your Legacy

Today's financial landscape looks different from a generation ago. If one of your goals is to leave behind a financial legacy, Required Minimum Distributions (RMDs)¹ could potentially disrupt your plans. Fortunately, there's a solution that helps address the impact of RMDs while guaranteeing legacy growth.

Guaranteed Legacy Growth

The Family Endowment Rider® (FER™), an optional rider available for an additional charge with BCA 10 2.0, provides an Enhanced Death Benefit that can help maximize your legacy planning. In addition:

- ▶ Up to a 14% Premium Bonus²
- ▶ 5% Enhanced Death Benefit growth through age 85³
- ▶ Take withdrawals and RMDs of up to 5% of the Accumulated Value and still grow your Enhanced Death Benefit⁴

All RMDs associated with the contract can be taken without additional charges, and withdrawals up to 5% of the Accumulation Value, including RMDs, reduce the Enhanced Death Benefit Value on a dollar-for-dollar basis (2.5% if SGO® Max or Flex GrowthSM is also elected).³ Beneficiaries receive the greatest of the Cash Surrender Value, Balanced Allocation Value or Enhanced Death Benefit value.

¹ The IRS requires individuals owning IRAs to take a required minimum distribution (RMD) each year once you reach a certain age, which varies by birthdate. The annual deadline for taking an RMD is December 31. You may delay your first RMD until April 1 of the year after you attain the required beginning age. If you delay your first RMD, you'll have to take your first and second RMD in the same tax year. If you fail to take your RMD, you may be subject to an excise tax. Please consult with your tax professional for guidelines specific to your situation. Visit IRS.gov for details.

² Up to 14% Premium Bonus for FER and must be elected at contract issue to receive the Premium Bonus.

³ The guaranteed compound annual growth rate is 2.5% if the Balanced Allocation Lifetime Income Rider® - SGO Max or Flex Growth option is also elected. The 5% Annual Enhanced Death Benefit Interest Rate applies until the later of the Contract Anniversary following the Owner's age 85 or the 8th anniversary. In AK, CT, HI, ID, MN, NH, NJ, OH, OR, PA, UT, WA, the roll-up years for the Annual Enhanced Death Benefit Interest Rate are also capped at 250% of premium, as determined based on the guaranteed compound annual growth rate at Contract issuance.

⁴ Withdrawals of any type will reduce the Enhanced Death Benefit. The first 5% of the Accumulation Value withdrawn in any contract year (2.5% if the Balanced Allocation Lifetime Income Rider® (BALIR) - Flex Growth or SGO Max is also selected) will reduce the Enhanced Death Benefit on a dollar-for-dollar basis. Withdrawals in excess of that percentage in any contract year (including Required Minimum Distributions) will reduce the Enhanced Death Benefit proportionally.

John and Patty

Ages 65 and 62

\$1,000,000 premium

Objective: John and Patty recently retired and want to protect their legacy while planning for RMDs.

Solution: John allocates \$1 million of his retirement savings to BCA 10 2.0 with FER. Even if his contract earns no interest, from age 75 to 95, John can take \$850,624 in RMDs. If John passes away at age 95, his beneficiary Patty would receive a death benefit of \$1,123,247.

This is a hypothetical example to show how BCA 10 2.0 and the Family Endowment Rider can work. Your experience will differ. Past performance is no guarantee of future performance.

Hypothetical Assumptions: \$1 million premium in BCA 10 2.0 with FER with Premium Bonus, 0.00% Annual Strategy Charge, 0.85% annual Enhanced Death Benefit Rider Charge Rate, no interest credits and no other optional riders elected. The Premium Bonus, and therefore the hypothetical values shown, will be lower in the following states: AK, CA, CT, DE, HI, ID, MN, MT, NH, NJ, NV, OH, OK, OR, PA, SC, TX, UT, WA. The Premium Bonus is also subject to a Premium Bonus Vesting Adjustment Schedule. For more information, please see the Family Endowment Rider Rate Sheet.

The Benefit of Legacy Optimization

Hypothetical Example Based on Guaranteed Values

By age 95, John took **\$850,624** in RMDs. If John passed away, Patty would receive a death benefit of **\$1,123,247**.

End of Year	Age	RMD Paid to Client	Total Income	Cash Surrender Value	Accumulation Value	Death Benefit ⁵
1	66	\$0	\$0	\$909,060	\$1,131,500	\$1,140,000

26	91	\$112,260	\$1,437,042	\$1,394,306	\$1,394,306	\$1,394,306
27	92	\$121,244	\$1,558,286	\$1,279,628	\$1,278,771	\$1,341,968
28	93	\$118,484	\$1,676,770	\$1,289,804	\$1,289,804	\$1,289,804
29	94	\$127,703	\$1,804,474	\$1,168,174	\$1,168,114	\$1,225,842
30	95	\$122,966	\$1,927,439	\$1,163,457	\$1,163,457	\$1,163,457

By age 95, John took **\$1,927,439** in RMDs. If John passed away, Patty would receive a death benefit of **\$1,163,457**.

Hypothetical Assumptions: \$1 million premium in BCA 10 2.0 with FER with Premium Bonus and 0.85% annual Enhanced Death Benefit Rider Charge Rate, Shiller Barclays Global Index with 150% Participation, 0.00% Annual Strategy Charge. **The Premium Bonus, and therefore the hypothetical values shown, will be lower in the following states: AK, CA, CT, DE, HI, ID, MN, MT, NH, NJ, NV, OH, OK, OR, PA, SC, TX, UT, WA.** Hypothetical 4.94% annual Interest Earnings based on the average back-tested movement of the Shiller Barclays Global Index from 12/31/14 to 12/31/24. The Shiller Barclays Global Index was established on 2/01/19. Performance shown before this date is back-tested by applying the index strategy, which was designed with the benefit of hindsight, to historical financial data. Back-tested performance is hypothetical and has been provided for informational purposes only. Past performance is not a guarantee of future performance. Assumes withdrawals are not subject to a Withdrawal Charge, Premium Bonus Vesting Adjustment or a Market Value Adjustment (MVA).

Annual Interest Earnings: Reflects the average annual return of the annuity product performance based upon the most recent 10 calendar year period.

Key Terms and Definitions

What is a Fixed Indexed Annuity?

A fixed indexed annuity is a contract issued by an insurance company. In exchange for your premium, the insurance company provides the opportunity for growth based in part on the performance of an underlying index, or group of indices, within a larger strategy while protecting your money from downside market risk. All guarantees are backed by the claims paying ability of the issuing carrier and may be subject to annual charges. Fixed indexed annuities are not stock market investments and do not directly participate in any stock or equity investments or index. It is not possible to invest directly in an index. Other restrictions and limitations may apply. For more information, please see the BCA 10 2.0 product brochure.

Balanced Allocation Value (BAV)

The BAV is calculated daily and is the greater of the sum of the Strategy BAV of all Strategy Options or the Return of Charge amount. Each Strategy BAV accounts for any additional interest from the beginning of the current Strategy Term Period that has not yet been credited to the Strategy Value of that Strategy Option. The BAV is utilized for the Terminal Illness Waiver, Confinement Waiver and Death Benefit. The BAV is not available upon Surrender or at the Annuity Date, nor is it the basis for the Free Withdrawal amount.

Family Endowment Rider (FER) Enhanced Death Benefit

An Enhanced Death Benefit is available through an optional rider. The FER pays a minimum amount equal to the initial premium accumulated at a guaranteed fixed interest rate (minus withdrawals). The Enhanced Death Benefit Crediting Base accumulates until the Enhanced Death Benefit Interest Stop Date, which is the later of 8 years or Contract Owner age 85. At death, your beneficiary will receive the greater of the base contract death benefit or the Enhanced Death Benefit. The FER provides a one-time Premium Bonus, which enhances the Accumulation Value on the Contract Date.

The Enhanced Death Benefit Rider Charge of 0.85% is calculated at the beginning of every contract year based on the Enhanced Death Benefit Crediting Base multiplied by the Enhanced Death Benefit Rider Charge Rate. The charge is deducted at the beginning of each month at a rate of 1/12th of the annual Enhanced Death Benefit Rider Charge from the Accumulation Value and in certain states, the Minimum Guaranteed Contract Value, until the Rider Charge Stop Date, which is the later of 8 years or Contract Owner age 85. The FER cannot be terminated once it has been purchased and attached to the contract; the rider will terminate upon the Annuity Date or payment of a death benefit under the provisions of the contract.

FER Withdrawals and Tax Considerations

Withdrawals of any type will reduce the Enhanced Death Benefit. The first 5% of the Accumulation Value withdrawn in any contract year will reduce the Enhanced Death Benefit on a dollar-for-dollar basis. If the Balanced Allocation Lifetime Income Rider is also attached, the dollar-for-dollar limits may reduce. Withdrawals in excess of that percentage in any contract year (including Required Minimum Distributions) will reduce the Enhanced Death Benefit proportionally. Any amounts withdrawn in excess of the Free Withdrawal amount will be subject to Withdrawal Charges, Premium Bonus Vesting Adjustments and MVAs. For more information, please see the Certificate of Disclosure. The FER is not life insurance, and any benefit payable under the rider will be taxable. The information contained herein is based on our understanding of current tax law. The tax and legislative information may be subject to change and different interpretations.

Free Withdrawals and Required Minimum Distributions

The Free Withdrawal amount is 5% of the Accumulation Value in the first year and 10% of the Accumulation Value for all remaining years. Withdrawals in excess of the Free Withdrawal amount (excluding Required Minimum Distributions) will not receive gains to-date and will be subject to any applicable Withdrawal Charges, Premium Bonus Vesting Adjustments and MVAs. Gains to-date are not credited on Lifetime Income Withdrawals or to withdrawals in excess of the Free Withdrawal amount.

The contract waives Withdrawal Charges, MVA and Premium Bonus Vesting Adjustments, if applicable, on Required Minimum Distributions.

Withdrawal Charges may vary by state. Withdrawals and the surrender of the Contract may be subject to federal and state income tax and, except under certain circumstances, will be subject to an additional tax if taken prior to age 59½. For more information, please see the Additional Information Insert and Certificate of Disclosure.

Market Value Adjustment (MVA)

The MVA feature applies during the Withdrawal Charge period to a surrender or Withdrawals in excess of the Free Withdrawal amount. This adjustment is in addition to any Withdrawal Charge amount. The MVA does not apply to Free Withdrawals, RMDs or payments made under the Confinement and Terminal Illness Waivers. Not applicable in MO.

Premium Bonus Vesting Adjustment (PBVA)

The optional, for a charge, Family Endowment Rider provides an Enhanced Death Benefit as well as a 14% Premium Bonus that enhances the Accumulation Value. The Premium Bonus is lower in the following states: AK, CA, CT, DE, HI, ID, MN, MT, NH, NJ, NV, OH, OK, OR, PA, SC, TX, UT, WA. While the Premium Bonus is added to the Accumulation Value, it is not added to the Enhanced Death Benefit. Withdrawals taken in excess of the Free Withdrawal amount will incur a Premium Bonus Vesting Adjustment (PBVA) in addition to any applicable Withdrawal Charges and MVA. The PBVA is equal to the portion of the Accumulation Value withdrawn in excess of the Free Withdrawal amount which is attributable to the Premium Bonus, multiplied by (100% minus the PBVA).

Contract Year	1	2	3	4	5	6	7	8	9	10	11
Premium Bonus Vesting	0%	0%	0%	0%	0%	0%	0%	0%	0%	0%	100%

For more information on the Shiller Barclays Global Index, please visit <http://shiller.barclays.com/global>.

Because the Shiller Barclays Global Index is denominated in US dollars, profits and losses generated by underlying equity indices in foreign currencies are converted to dollars on a daily basis. Costs and fees equal to 3-month USD LIBOR rate plus 0.55% (before April 26, 2022) or SOFR plus 0.8116% (after April 26, 2022) per annum are deducted from the performance of each Equity Component.

Fees equal to 0.55% per annum are deducted from the performance of the Commodity Index.

Fees equal to 0.22% per annum are deducted from the performance of the Fixed Income Components.

The Shiller Barclays CAPE® Allocator 6 Index and the Shiller Barclays Global Index (collectively, the "Indices") have been developed in part by RSBB-I, LLC, the research principal of which is Robert J. Shiller. RSBB-I, LLC is not an investment advisor, and does not guarantee the accuracy or completeness of the Indices, or any data or methodology either included therein or upon which they are based.
